

A level Geography – Summer Tasks

During the A-Level course you will study topics on Population; Energy; Rivers; Glaciation; Development; Conflict; Weather and Climate; and Tectonic Hazards.

We will encourage you to take an interest in contemporary issues that are linked to these topics. An easy way to do so is to follow the department's Twitter account (@qmgsgoing) as we will regularly post links to articles that are relevant to you. Be ready to discuss an article that particularly interested you during your first lesson!

We will make extensive use of online databases to supplement our work. You may want to familiarise yourself with the Gapminder website for instance:

www.gapminder.org

You may wish to consider subscribing to one of the following periodicals:-

Geographical Magazine: <http://www.rgs.org/OurWork/Publications/geographical+magazine.htm>
