

QMGS VPN Access Instructions

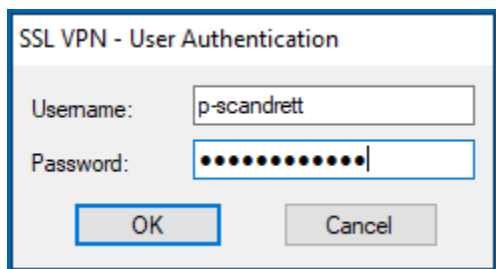

1. Go to <https://qmgs-xg.waveconnect.co.uk>
(There is now a link to this under the "more" section of our web site).
2. Log in using your school account (e.g. p-scandrett).
3. Click "Download client and configuration for Windows".

4. Install the program (just accept everything).
5. You should now see a traffic-light icon down the bottom right of your screen.
(If you can't see it, click the ^ symbol next to the clock).

6. Double-click on this and Connect.
7. When asked for username/password use your school login details again (no @marian or @qmgs.walsall.sch.uk needed).

8. If the traffic-light is green you are connected to the school.
9. If you are on a works laptop, your shared drives should just work. SIMS should work as normal too.

If you are using a home pc or laptop please let us know. (You will need drive mappings setting up, and will also be prompted for your username/password when you access these resources.)

Note: Only steps 1 -5 will work if you install this in school. You actually have to be outside our network (i.e. at home) to connect to our network over the VPN.
